

EDUCATION FOUNDATION NEWS

The Education Foundation of Morris Plains (www.educationfoundationmp.com) is on a roll! On May 5, we hosted the successful second annual “Strides for Education 5K Run/Walk” at Central Park of Morris County; on June 8, we saw the culmination of the EFMP-supported project “Stories About in the Community of Caring,” a collaboration between the Borough School 3rd and 5th grades and community members, which was the brainchild of dynamic Borough School teachers Ginny Hussey and Larissa Wilczak. The beautifully printed and illustrated book that resulted from this project tells many stories of long-time Morris Plains residents, as seen through the eyes of young writers and illustrators.

In June, we celebrated our district’s 8th graders on the momentous occasion of their graduation from Borough School with congratulatory lawn signs. Keep in touch, graduates! We also approved three teacher grant proposals. In the 2016-17 school year, as a result of EFMP support of teacher proposals:

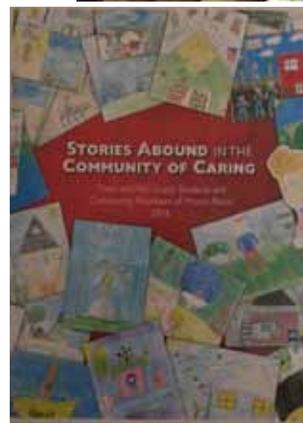

- kindergartners will benefit from play-based learning;
- all Mountain Way students will have a chance to create 3D “Doodles” in the STEM/iLab;
- and Borough School students will experience interactive, state-of-the art mobile learning technology--the EFMP’s contribution to the brand-new STEM/iLab that will open at Borough School in September.

Next up: On January 22, 2017 at 3 p.m., we will host the Harlem Wizards, playing our fearless

Morris Plains teachers, in the Morristown High School gym. Mark your calendar for this incredibly fun fundraiser!

Educational innovation takes many forms. It is the EFMP’s goal to support our teachers and administration as they seek to bring excellence in education to all Morris Plains students.
